Fungicide

Authorisation Number:

63052/56577

Composition:

250 g/L

Mandipropamid

Activity Group:

Group 40 Fungicide

Formulation:

Suspension Concentrate | SC

Controls Downy Mildew in Grapes and Oilseed Poppies.

Product CP: Tabs

- [Application Advice](#)

Mixing and spraying

1. Partly fill the spray tank with water. 2. Start the agitation. 3. Add the correct amount of product to the spray tank with the agitation system running. 4. Continue agitation while topping up the tank with water and while spraying. Apply by high volume (dilute) sprayer or by concentrate sprayer. Ensure that the correct amount of REVUS is applied per hectare irrespective of the total spray volume applied. Total volume of spray mix applied should be sufficient to ensure thorough spray coverage is achieved.

Tank mix lifespan

Use the spray mix as soon as possible after preparation.
