~Discontinued

Authorisation Number:

58167/20 or 100 or 110/0607

Composition:

250 g/L

Propiconazole

80 g/L

Cyproconazole

Activity Group:

Group 3 Fungicide

Formulation:

Emulsifiable Concentrate | EC

Controls certain fungal diseases of Barley and Wheat.

Product CP: Tabs

- [Application Advice](#)

Mixing and spraying

1. Partly fill the spray tank with water. 2. Start the agitation. 3. Add the correct amount of product to the spray tank with the agitation system running. 4. Continue agitation while topping up the tank with water and while spraying. 5. Use the spray mix as soon as possible after preparation. May be applied by boom spray or aircraft. Ensure complete coverage of all leaves and stem is obtained. The object of spraying is to keep the upper 2 to 3 leaves green and functioning through grain filling stage.

Water volume

With boom sprayers, as a guide, apply in spray volumes ranging from 50 to 100 L water per hectare. With aircraft, as a guide, apply 10 to 20 L water per hectare with the lower rate being used when applications are made with a cross wind of not less than 5 knots.
