Other Restriction of Use

DO NOT apply if heavy rains or storms that are likely to cause runoff are forecast within 2 days of application.

Application Advice

Mixing and spraying

DO NOT mix, load or apply this product within 20 m of any well, sink hole, intermittent or perennial stream. Stir product or invert container several times before opening as settling of contents may occur after storage for some weeks. Pour the product into the spray vat through a strainer to remove any dry particles or flakes, which can occasionally occur under hot storage conditions. Add the full quantity of GESAPAX COMBI 500 SC to the partly filled tank while agitating. Fill tank and agitate to ensure thorough mixing. Continue agitation while spraying. Agitate vigorously from the bottom if allowed to stand. Reseal part used containers immediately. Ground Application: Boom spray with flat fan nozzles. Ensure good spray coverage is obtained. Aim to apply 50 to 110 L/ha. Aircraft Application: Always spray in a cross wind of less than 5 knots, or use smoke generator to indicate air movement. Ensure good spray coverage is obtained. For maximum coverage use fine nozzles. Apply 20 to 30 L/ha.
