Atrazine

Activity Group:

Group C Herbicide

Formulation:

Suspension Concentrate | SC

Controls weeds and grasses in TT-Canola, Lupins, Maize, Sorghum, Sugarcane and other crops.

Product CP: Tabs

- [Classification and Security](#)
- [Application Advice](#)

Other Restriction of Use

DO NOT apply if heavy rains or storms that are likely to cause runoff are forecast within 2 days of application.

Mixing and spraying

DO NOT mix, load or apply this product within 20 m of any well, sink hole, intermittent or perennial stream. Stir product or invert container several times before opening as settling of contents may occur after storage for some weeks. Pour the product into the spray vat through a strainer to remove any dry particles or flakes, which can occasionally occur under hot storage conditions. Add the full

quantity of GESAPRIM 600 SC to the partly filled tank while agitating. Fill tank and agitate to ensure thorough mixing. Continue agitation while spraying. Agitate vigorously from the bottom if allowed to stand. Reseal part used containers immediately. Always apply the product to an even unridged seedbed.
