- [Application Advice](#)

Other Restriction of Use

DO NOT apply if heavy rainfall that is likely to cause runoff is forecast or irrigation is to take place within 48 hours of application.

Mixing and spraying

1. Partly fill the spray tank with water.2. Start the agitation.3. Add the correct amount of product to

the spray tank with the agitation system running.4. Continue agitation while topping up the tank with water and while spraying.Spray equipment should be carefully calibrated before use. Complete coverage of weed seedling is required for maximum knockdown effect. A spray volume of 50 to 100 L/ha is recommended.
