

AgriClima opens for 2017 Season

Broadacre
01.11.2016

As AgriClima 2016 wraps up with a number of growers receiving pay-outs this month due to low rainfall during the season, we are now getting ready to launch AgriClima for the 2017 Season.

AgriClima has been helping grain growers shoulder the risk of low rainfall periods since 2014.

Eligible grain growers receive a 15% cash-back on their investment in Syngenta technology if rainfall does not meet a threshold level over an elected period during the season.

Since launching in 2014, over 400,000 hectares has been registered under AgriClima.

Registering for AgriClima is free of charge; however grain growers must meet eligibility requirements. To be eligible, growers must spend at least \$50 per hectare (inc GST) on select Syngenta products across a minimum of 300 hectares.

To find out if you are eligible visit www.syngenta.com.au/agriclima
