Insecticide

Authorisation Number:

51832/51063

Composition:

600 g/L

Thiamethoxam

Chemical Family:

Group 4A Insecticide

Activity Group:

Group 4A Insecticide

Formulation:

Suspension Concentrate | SC

For treatment of cotton, maize, sweet corn, sorghum and sunflower seed to control various early season soil and sucking pests.

Product CP: Tabs

- [Application Advice](#)

Mixing and spraying

For large-scale seed treatment the product should be applied diluted with water in specialised seed treatment equipment. As for all such seed treatments, a good flow and metering system for the initial prepared solution is important. Depending on the type of seed treatment equipment, it may be necessary to increase the recommended amount of water slightly in order to ensure an optimal flow of the solution and an even treatment of seed.

Water volume

Fill the solution tank with the required volume of water and mix with the appropriate volume of CRUISER 600FS. Total volumes of not less than 500 mL nor more than 1 L water/100 kg seed are recommended.
