Formulation:
Suspension Concentrate | SC

For the control of various insect pests in Brassicas and Fruiting and Leafy Vegetables.

Product CP: Tabs

- Application Advice

Application Advice

Mixing and spraying

Add the required amount of DURIVO to clean water in half filled spray tank with the agitator or by-
pass in operation. Maintain agitation while filling tank with remainder of water. Agitate whilst spraying.

**Water volume**

Seedling Tray Application: Apply a single application as a slurry with water in a total volume of 2.5 L per 1000 seedlings. Planting Hole Drench Application: DURIVO should be applied with water in a minimum total volume of 50 mL per seeding directly at the base of transplanted seedlings or into the planting hole immediately before transplanting.
